Notes: This panel was designed to fit with several garden panels with dimensions of 15.25” x 7.25”. If you print the pattern with a 153% enlargement it will match the other 15.25” x 7.25” panel sizes. Why 15.25” x 7.25”? When we designed the Garden Panel Series, we found that most of the multi color glass we used was available in sizes that would trim down to 15.25” x 7.25” with the least amount of waste. This panel will still look good in any size, but we like how it looks hanging with our other Garden Panels.
